#### Construction: Profil and steel plates of 3701 quality

## FEEDING BARGE

There are types six or nine silos with a carrying capacity 130-150 tons of feed. In construction of our barge we use **profile and steel plates of 3701 quality. The barges are certified by CLASS SOCIETIES.**

The barges have four safety tanks. Further the barges are equipped with control room, engine room, diver's room, WC/shower, kitchens, living room, drinking water tank, sewage tank and F.O tanks.

The bottom and vertical are of the barges have five coat of paint, applied professionally.

Interiors are painted three coat of paints.

Engine room are equipped with engines approved by the client.
