

## Knives

Small Investment – Big Advantages!

Mora Of Sweden blades are made of hardenable stainless steel- Sandvik 12C27 (hardened to HRC 58), producing knives with extreme strength, long life as well as having high resistance to moisture without rusting.

Good ergonomic design is another classic hallmark of knives from Mora of Sweden. They are solid, substantial, and feel comfortable in the hand when you use them. Mora of Sweden knives are designed for work, demanding high yield, well suitable for the meat, fish & poultry industries. The range is extensive, allowing the choice of a personal favourite depending on shape, size or other requirements. Different cutting edges, handles and design is possible.

Range of Knives:

- Meat and poultry / slaughterhouse knives
- Fish processing knives
- Food industry knives
- Butcher knives
