

Fish Processing / OMAR / Squid, cuttlefish eviscerating machine

This machine eviscerates squid, cuttle fish, cephalopods and any kind of fish (except flat fishes) through a sucking gun that carries the offal's into an offal's tank.

This special suction system allows to remove the offal's and blood and drastically reduce bacterial level
Different models are available from 1 to 8 operators. (Depends on your capacity.)

Sucking gun for each operator.

Warning light to stop working process when offal tank is full

Capacity: One fish every 3-4 seconds (per operator)

Working table and offal's tank built in stainless steel.
