Fish Processing / OMAR / Glazing Machine

Omar glazing machine is built in stainless steel with 600 mm conveyor belt.
The machine is supplied with;

Dip glazing

An automatic water refrigerator to keep the water at the desired temperature

Glazing percentage control

Fish no-sticking vibration

Panel Control

Flexible plastic cover over the water surface to avoid iceberg effect

Dimensions: 4029mm length x 1154mm width x 1917mm height. 1077mm Tank height

Capacity: 2500kg / hour

Glazing machine can also be produced without automatic water refrigeration

(water cooling system)In this case the glazing machine requires 50kg/h of ice.

Glazing machine is suitable for octopus, squid, cuttlefish, whole fish, fish fillets, anchovy and similar.
